

Melbourne Metro 2

Council is seeking the federal government to support the Melbourne Metro 2 (MM2) project and for the state government to bring forward the planning for MM2, with the plan to include the duplication of the Altona Loop and a link from Newport to Sunshine via the existing freight line.

Council is also calling for this additional connection to include a train station in Altona North to cater for the growing population and employment expected from the Precinct 15 - Altona North Strategic Development Site, the Bradmill Precinct in Yarraville, and the Brooklyn Business Park.
