

Works Update

Southern Open Space – Bruce Comben Reserve

July 2023

Contractors have taken site possession with site set up in progress.

In mid-July, the contractors will commence demolition works including removal of the existing non-working lights at the tennis courts and earthworks including removal of contaminated soil (in accordance with Contamination Management Plan).

Parts of the reserve including the pedestrian path that cuts through the car park (at the corner of Henry Drive and McNeil Drive) have been closed to mobilise the car park upgrade works. Adequate site and traffic signs are installed as per an approved Pedestrian Management plan to notify and divert pedestrians towards alternate walking/cycling routes.
