

Works Update

Southern Open Space – Bruce Comben Reserve

June 2023

The delivery of proposed open space works have been scheduled to commence in July 2023 and anticipated to be completed by the end of the year (weather permitting).

This project will create a new vibrant open space at the south end of the reserve catering to the varied needs of the community, which will include:

- new playground, multipurpose court and street furniture
- walking and cycling network
- dog off-lead zone
- BBQ and shelter
- public toilet facility
- planting of trees and shrubs throughout the park
- an upgrade and extension of carpark and new street lighting.

Traffic management will be in place diverting traffic away from the works during excavation and major construction works. Finalised dates for these works will be communicated closer to the time. Some pedestrian paths may be closed while works are being completed. Please seek alternative route.
