

This TravelSmart Map was developed in partnership with the Department of Transport, Melbourne and Hobsons Bay City Council to encourage the use of sustainable transport. It has been designed to highlight local sustainable transport options on a pocket-sized complete street map with standard Melway references.

Walking and cycling, like any physical activity are potentially hazardous. Use your common sense. Stay within your comfort zone, wear your seatbelt and follow any applicable laws.

© State of Victoria 2011

With 55 per cent of all car trips less than five kilometres, there's room to increase the number of people choosing sustainable travel options such as walking, cycling and public transport. By providing better access, encouraging changes in travel behaviour and improving end-of-trip facilities for people, we can support the growth of sustainable travel.

TravelSmart is an initiative of the Victorian Government and aims to reduce people's dependency on cars and encourage the number of car journeys by better planning your travel.

For more information, visit travelmart.vic.gov.au/travelmart

Sciencewalk to Spotswood
Improved pedestrian and cycling networks in Spotswood have linked Scienceworks Museum with key local destinations and public transport to enhance local transport options. The installation of a series of artworks and wayfinding signage has further improved sustainable transport connections in the area.

Hotspots Rectification Project
The Hobsons Bay Coastal Trail is a key pedestrian and cyclist connection forming part of the Port Phillip Bay Trail. Crossing and surface treatments at the Ferguson Street Roundabout and along the Anchorage Restaurant precinct have not only improved safety and access but have also reduced modal conflict along the trail.

Laverton Walkers
Golden Age Club Crown Street Laverton
Ph. 9392 7149 (Josie Magro)
When: Thursdays 9.00am.

Laverton Patrol Walkers
Laverton Maternal and Child Health Centre
8 Donald Street, Laverton

Federation Trail
The Federation Trail is a 40km off-road shared path that runs for 24km from Millers Road in Brooklyn through to the Werribee River.

Skeleton Creek Trail
The Skeleton Creek Trail is a sealed off-road shared path that runs along the creek linking Cheetham Wetlands to Point Cook and Wyndham.

Laverton Creek Trail
Currently under construction, the Laverton Creek Trail will provide off-road pedestrian and cyclist access from Merton Street to the Hobsons Bay Coastal Trail.

Hobsons Bay Coastal Trail
The Hobsons Bay Coastal Trail is a 23 km off-road shared path which runs from the Westgate Bridge in Spotswood to Skeleton Creek in Altona Meadows.

Cycling in traffic
When in traffic be visible and confident but prepare for evasive action. Look ahead for gaps in traffic.

Take or share the lane
Depending on lane width and traffic speed, keep left or take the lane.

Cross tram and train tracks at wide angles

Keep your distance

Don't hug the gutter
If you hug the gutter you will get squeezed out. Don't weave in and out of empty car parking spaces to stay close to the gutter.

Positioning in traffic
Be aware of drivers' blind spots to the side and next to their back doors.

Roundabouts
Take the lane
As you approach the roundabout, move into the middle of the lane. As you enter, look ahead and make eye contact with drivers but prepare to move out of the way.

Single lane roundabouts
Watch for cars going straight from behind or beside you. Turn into stages if you need to. Two cyclists can legally take both lanes. Consider avoiding the roundabout by taking another route.

Multi-lane roundabouts
Watch for cars going straight from behind or beside you. Turn into stages if you need to. Two cyclists can legally take both lanes. Consider avoiding the roundabout by taking another route.

Riding in the wet
Watch out for slippery tram tracks, grates and metal covers, especially when turning. Squeeze your brakes gently before stopping to clear water off the rims. Beware of puddles as they may be deeper than they seem. You and others will have a longer stopping distance in the wet.

Lock your bike
Use a D-Lock
Cable locks are easily cut. Get a good D-Lock or armoured cable. Using a cable and D-Lock together is even more secure.

Where and how to lock
Always lock your bike, even when it's at home. Look in visible areas with lots of people around. Don't lock to "sucker poles" that can be lifted out of the ground. Check locks in a plastic bag or just wear sandals. Keep a change of clothes at work!

Get a good bike bag
Use plastic bags inside your bike bag to keep things dry. Watch out for slippery tram tracks, grates and metal covers, especially when turning. Squeeze your brakes gently before stopping to clear water off the rims. Beware of puddles as they may be deeper than they seem. You and others will have a longer stopping distance in the wet.

Car doors
It's illegal to open doors into traffic
A person must not cause a hazard to any person or vehicle by opening a vehicle door, leaving the door of a vehicle open, or getting off or out of a vehicle.

To avoid doors, look:
• Glance car windows for hazards
• in mirrors of trucks and vans
• at cars that have just parked
• at cars' tail lights

Watch the door zone
If you can't see into cars, ride slower or move out of the door zone. Be aware of what's behind you if you have to swerve out. Take a lane if you are being forced into the door zone.

If a door opens
Use your brakes and slow down. Move out of the door zone but don't swing into traffic.

If you get hit
If you're hit by a door and injury or damage results, it's a traffic accident and details must be exchanged. Report uncooperative motorists to the police.

Shared path code of conduct
When using and enjoying these paths remember to look out for fellow path users.

Pedestrians
• Keep left
• Move off the path when stationary
• Be aware of other path users and cyclists
• Wear bright clothing if walking at night

Lights
Use steady lights to see and flashing lights to be seen. Buy lights that take standard battery types (AA or AAA) and carry spares with your puncture kit. Avoid lights that need a tool to change batteries.

Be reflective
Add reflective material, tape and stickers to your helmet, clothing, shoes, bike and bags. Reflective tape, fabric and stickers can be sourced from fabric shops, hardware stores, sporting and bike shops.

Riding behaviour
Steer wide of pedestrians. Watch out for people who may step in front of you. Look for car headlights in side streets and from behind.

WalkSmart
The WalkSmart website makes it fun and easy to stay motivated and reach the magic 10,000 steps per day recommended for health and wellbeing.

CycleSmart
Cycling is an inexpensive and convenient way to travel within your local area and beyond.

Once registered with WalkSmart, you can log your daily steps, set personal goals and receive weekly updates of your progress.

Why buy a car when you can share one?
As a car share member, you have access to clean, new cars whenever you need them. You pay no registration, petrol or maintenance – just a simple fee based on your usage. Cars are available 24/7 for use for an hour or longer if you need it. Car share cars live at priority on and off street parking bays.

Travel by Ferry
Travelling by ferry is a great way to experience the true maritime character of Williamstown and offers car-free access to the city.

Williamstown Ferries
Services operate hourly Monday – Sunday. Drop passengers at Scienceworks on request. Ph. 9682 9555. Ph. 9517 9444 (24 hour information line).

There are a number of mobile phone tools to provide you with personalised train, tram and bus service information to your mobile.

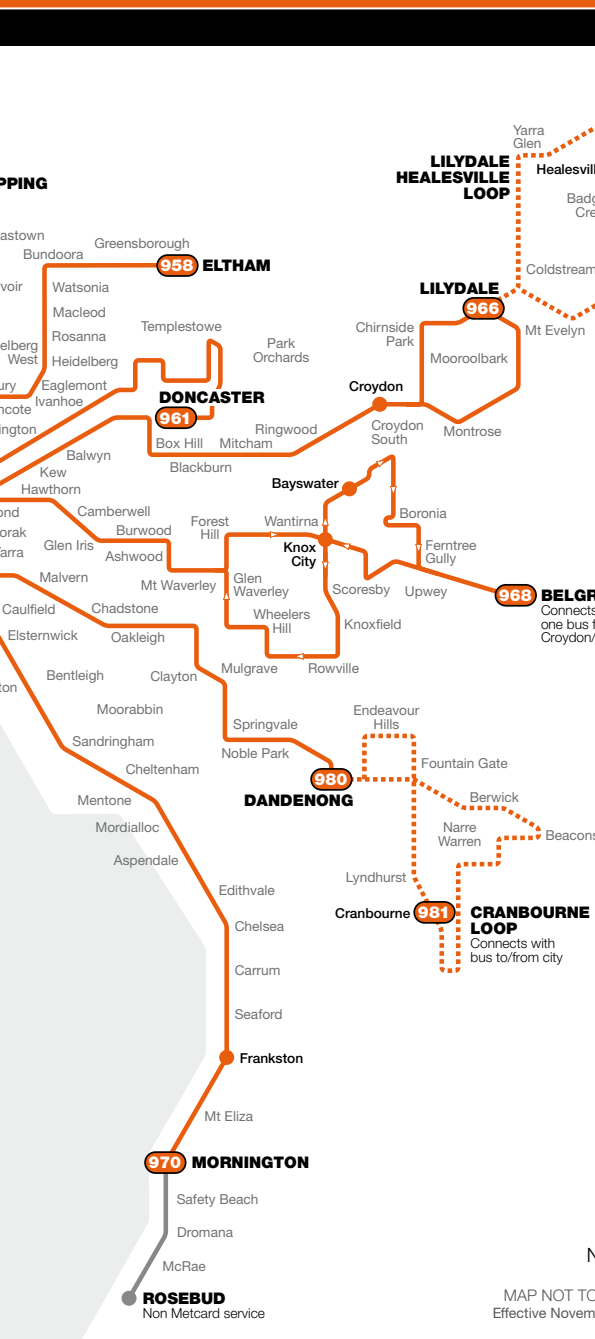

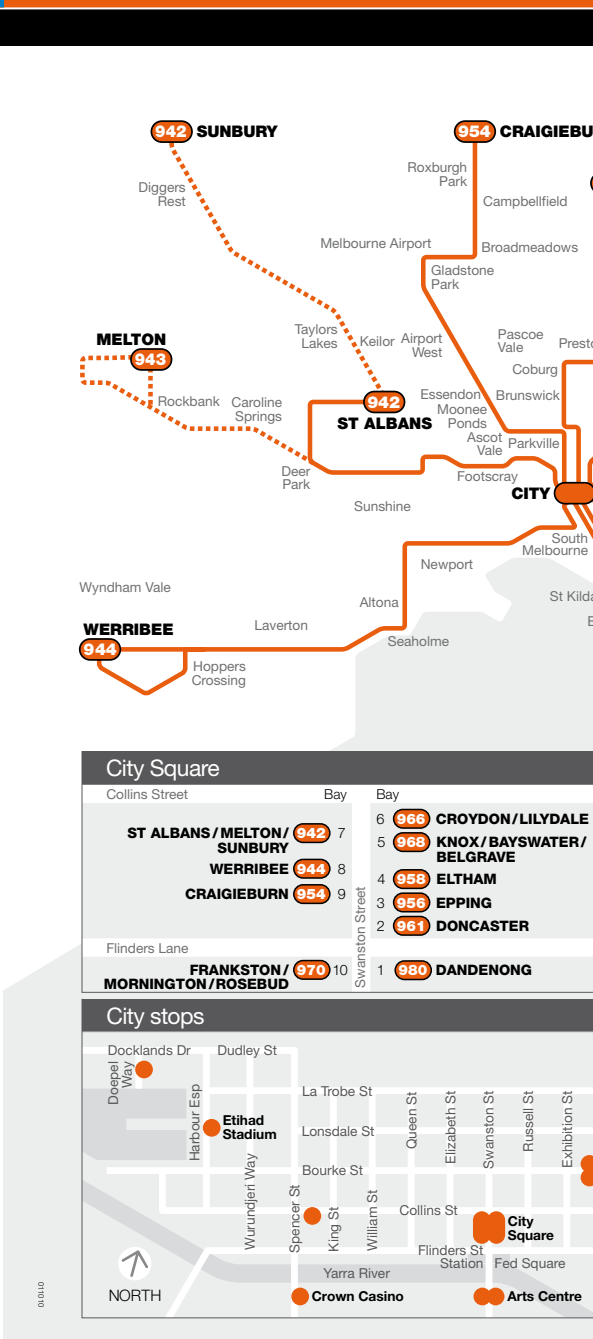

Metro Trains Platform 1
Platform 1 offers metropolitan train travel information via SMS and email. Join up and choose from instant SMS timetable information, SMS updates on disruptions or email alerts for weekend and evening improvement works.

Yarra Trams tramTRACKER
tramTRACKER® from Yarra Trams provides real-time train arrival information for every stop on the network. It's available by phone, SMS, iPhone and online. For more tramTRACKER® information visit tramtrackerr.com.au

Metlink mobile phone tools
Metlink's free Nokia and iPhone applications give users train, tram and bus timetables. The applications also feature the Metlink journey planner, live train information, maps, and you can save your regular stops as favourites for quick access. To download the Nokia app visit metlinkmelbourne.com.au. To download the iPhone app visit the iTunes Store.

Trains
All train stations are wheelchair accessible, except Haysman Station. Passengers who need help boarding trains should wait on the platform near the front of the train. This is marked with a yellow or white rectangle on the pavement.

Trams
With 100 low-floor trams and more than 300 platform stops, Melbourne's tram network is increasingly accessible to passengers using mobility aids.

220 Sunshine Station to Gardenvale
via Footscray, Southgate, Prahan, Orong Road

via Newport, Altona Gate Shopping Centre

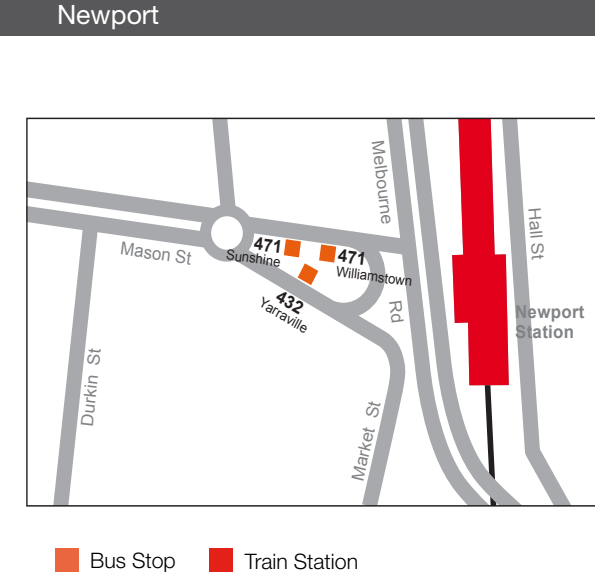

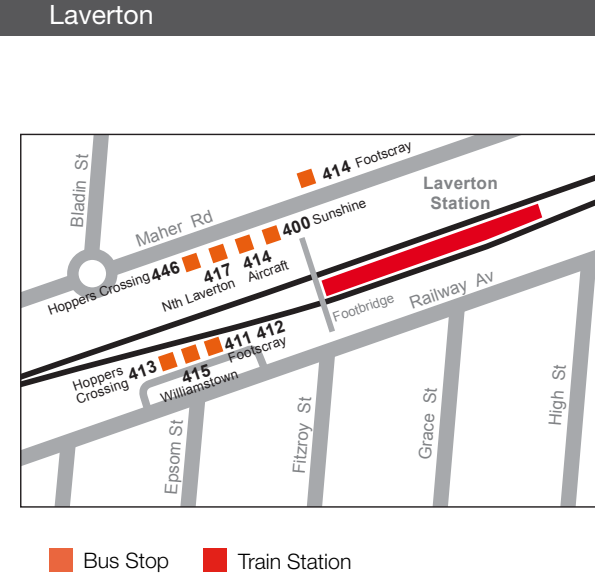

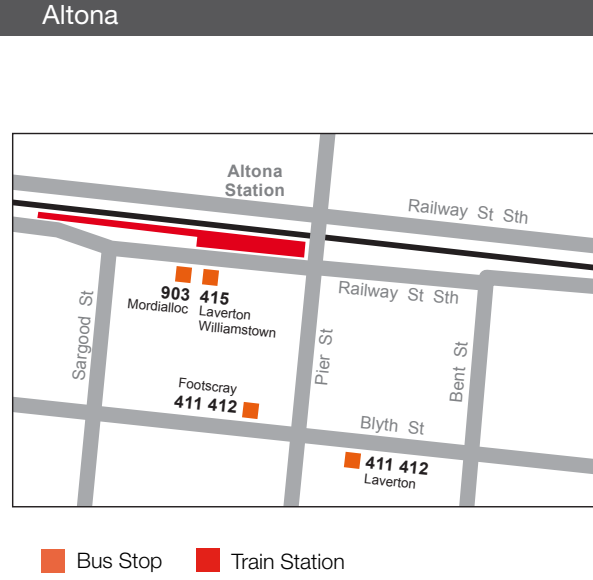

472 Williamstown to Moonee Ponds
via Footscray

606 St Kilda to Port Melbourne
via Bay Street

Lockers
Bike lockers are available at stations across Victoria. They can be rented free after paying a bond of \$100 for a new locker with a built in lock, or \$50 for lockers that require you to supply a lock.

Cages
New bike cages are being installed at stations across Melbourne and key regional centres. The bike cages, known as Parkletter cages, provide undercover, free and secure parking for around 26 bikes.

Metlink mobile phone tools
Metlink's free Nokia and iPhone applications give users train, tram and bus timetables. The applications also feature the Metlink journey planner, live train information, maps, and you can save your regular stops as favourites for quick access. To download the Nokia app visit metlinkmelbourne.com.au. To download the iPhone app visit the iTunes Store.

SmartBus
A premium bus service, SmartBus complements Melbourne's radial train network, providing 'cross-town' connections to train stations, train lines, key local destinations and other activity centres.

SmartBus runs more frequently and for longer hours than most bus services. A combination of road priority works and the use of smart technology means they are also more reliable.

By remaining in continuous contact with their depot, SmartBus is able to provide real-time travel information to passengers at selected high-use bus stops and bus-train interchanges.
