

EUCALYPTUS MANNIFERA

Red-spotted Gum

Botanical name

Common name

CHARACTERISTICS

- Medium sized, evergreen tree.
- Smooth white, powdery, trunk.

TOLERANCES

- Moderate to high tolerance of drought.
- High tolerance to frost.

DESCRIPTION

Typical height:
10-14 metres

Typical width:
10-12 metres

Growth rate:
Moderate

Typical form:
Narrow-domed, ascending branches

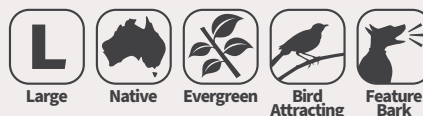

ORIGIN

Western side of the Central Tablelands and the Southern Tablelands of New South Wales, south to eastern Victoria

FACTS AND TRIVIA

Despite sometimes being referred to as 'Brittle Gum', this species is rarely prone to sudden limb failure.

Commonly used as a street tree in Canberra, due to its high frost tolerance.
