

## Handling energy costs

Australian Fluid Handling (AFH) is one of Australia's leading providers of customised and engineered compressors, pumps and skid packaged equipment.

Through Hobsons Bay City Council's Light\$mart program, AFH have replaced 143 lights throughout its offices, workshop and warehouse space with new, energy efficient LED lights reducing energy and maintenance costs and saving greenhouse gas emissions.

Each year, AFH will now be saving an additional:

- \$3,942 in energy and maintenance costs
- 19,546 kWh of electricity
- 24.6 tonnes of greenhouse gas emissions

*“This energy savings program has really been a “no brainer” since it is great for the environment, has a very quick pay back and provides such an improvement of the working conditions and appearance of our business” says Dietmar Hildebrand, CEO.*
