

Parking Management Strategy *Altona Beach precinct*

HOBSONS
BAY CITY
COUNCIL

Last year Council presented a plan to the Hobsons Bay community proposing changes to parking at Altona Beach and the surrounding local streets, including introducing parking meters.

The changes aimed to:

- Improve the availability of parking near the beach
- Address parking and access issues on local streets over summer

The changes included:

- Parking meters on the Esplanade between Sarros Street & Millers Road
- Line marking on residential streets near the beach
- Time restricted parking on residential streets (November-March only)

Community feedback *You spoke, we listened*

Your feedback confirmed there was a need to better manage parking in Altona. Recommendations from the community resulted in the following changes to the plan:

- Proposed 1-hour parking were extended to 2-hour parking on residential streets
- Parking restrictions on residential streets to apply only over the summer peak (November-March only)
- Extending the areas where the changes would be made on residential streets. The final plan of parking changes is detailed on the map provided.

Parking permits for residents

All Hobsons Bay residents are eligible for ticket machine parking permits, which will allow you to park for free in ticket machine areas (time restrictions still apply).

Residents of the local streets with timed parking are eligible for residential parking permits and one visitor parking permit

per household, which will exempt permit holders from the time restrictions in their street.

For more information on parking permits and to apply, visit hobsonsbay.vic.gov.au/parking by scanning the QR code, or call Council on **1300 179 944**.

What happens next?

- Works to install the parking signs and line marking have been scheduled for March and April.
- Further notification will be provided to residents before works begin on their street.

Evaluation

Parking will be regularly observed and surveyed before and after the changes so we can assess their impact and make sure they result in improved access for residents without adverse impacts.
